Summary

Economist and applied researcher with an MS in Economics from NUST, with experience in econometric analysis, economic data management, quantitative research, and structured qualitative analysis. Experienced in Stata-based data cleaning and management, time-series econometrics, model estimation, and research writing, with additional experience in Power BI and Excel. Lead author of a journal article currently under refereeing at the *Journal of Policy Modeling* and author of a completed policy brief for the Economic Advisory Group. Comfortable working across quantitative and qualitative research tasks within applied research environments.

Education

National University of Sciences and Technology (NUST), Islamabad Sep 2021 - Jul 2025
MS in Economics, GPA 3.35/4.00

- Thesis:*Assessing the Effectiveness of Monetary Policy on the Manufacturing Sector in Pakistan: A Disaggregated Analysis.* Conducted disaggregated time-series analysis across seven Large-Scale Manufacturing Industries (˜50% of sectoral output), using VAR methods to estimate sectoral responses to monetary and macroeconomic shocks. Interpreted cross-industry differences in monetary-policy responses in relation to differences in trade exposure, capital intensity, and industrial linkages. Supervisor: Dr. Ather Maqsood Ahmed.

International Islamic University, Islamabad Aug 2013 - Jul 2015
MSc in Economics (2 years), GPA 3.22/4.00

- Coursework: microeconomics, macroeconomics, econometrics, development economics, international trade, monetary economics.

Gomal University, Dera Ismail Khan Apr 2011 - May 2013
BA, Economics & Statistics

Research Experience

Associate Member, Economic Advisory Group (EAG) April 2026 - March 2027
Islamabad, Pakistan

- Conducted a systematic thematic analysis of State Bank of Pakistan Monetary Policy Committee statements (2022–2026) for a policy brief, *"Diagnosing Inflation: The SBP Monetary Policy Committee's Causal Narratives and Their Empirical Fit,"* examining how the Committee explains inflation, which causes it emphasises, downplays, or omits, and whether its stated policy logic is consistent with subsequent inflation developments.
- Screened the MPS corpus against predefined criteria, producing 1,034 coded observations across 14 themes using a hybrid deductive-inductive codebook approach. Compared the Committee's stated inflation diagnosis with subsequent inflation drivers using Pakistan Bureau of Statistics data and SBP CPI decomposition over a six-month lag.
- Policy brief completed and currently under review.

Lead Author, Journal Article (under refereeing), with Dr. Ayesha Nazuk, NUST 2026
Islamabad, Pakistan

- *"Monetary Policy Transmission to Pakistan's Manufacturing Sector: A Structural Break-Adjusted Vector Error Correction Analysis."* Manuscript under refereeing at the *Journal of Policy Modeling* (Elsevier, SSCI Q2).

- Estimated a structural break-adjusted VECM using 2006–2021 data to examine monetary policy transmission to Pakistan's manufacturing sector. Findings identify exchange rate shocks as the dominant transmission channel and document a structural regime change around 2018, from credit-channel to exchange-rate-channel dominance, following IMF-driven exchange rate liberalization.

Additional Experience

Research Intern, AI for Social Sciences, SINES, NUST May 2025 - Jan 2026
Islamabad, Pakistan

- Completed hands-on training in Power BI, data analytics, and prompt engineering; supported data preparation, exploratory analysis, and documentation for AI-driven social science research deliverables. Also, contributed to the development of an RD dashboard for Pakistan using Tableau, integrating national patent and research publication data from multiple sources, including the Pakistan Patent Office and Web of Science

Assistant Manager (Finance), ABK Capital (Pvt.) Ltd. Nov 2019 - Dec 2020
Islamabad, Pakistan

- Prepared and reviewed monthly financial reports, budgets, and forecasts; managed accounts payable/receivable; built Excel/VBA-based reporting automation that reduced manual report preparation time and errors.

Skills

- **Statistical & Econometric Software:** Stata, EViews, R (basic), OxMetrics
- **Econometric Methods:** VAR/VECM modeling, time-series analysis, structural break testing, model estimation
- **Data Management:** data cleaning, merging/reshaping, panel data construction, firm-level trade dataset preparation
- **Qualitative & Policy Research:** codebook thematic analysis, policy brief writing
- **Reporting Tools:** Power BI, Advanced Excel (VBA, Power Query)

Publications & Research Output

- **Journal article (under refereeing, lead author):** "Monetary Policy Transmission to Pakistan's Manufacturing Sector: A Structural Break-Adjusted Vector Error Correction Analysis," with Dr. Ayesha Nazuk. Manuscript under refereeing at the *Journal of Policy Modeling*.
- **Policy brief (completed, under review):** "Diagnosing Inflation: The SBP Monetary Policy Committee's Causal Narratives and Their Empirical Fit (2022–2026)," Economic Advisory Group.
- **MS Thesis (2025):** "Assessing the Effectiveness of Monetary Policy on the Manufacturing Sector in Pakistan: A Disaggregated Analysis," NUST.

Certifications

- **Stata for International Trade Statistics**, S3H, NUST (Sep 2024): hands-on training in trade-data import and cleaning, merging/reshaping firm-level export datasets, currency deflation, export concentration analysis, and panel-data setup.
- **EAG Associate Programme, 2025 Cohort**, Economic Advisory Group & PRIME Institute: competitively selected nationally; workshops on monetary policy, capital flows, and debt sustainability.
